GT: white = landslide

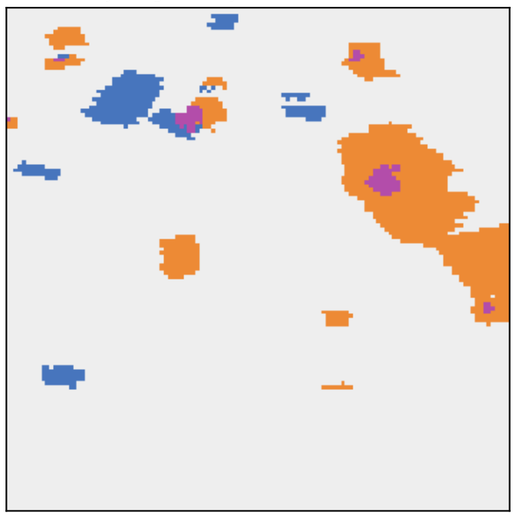

Target geometry

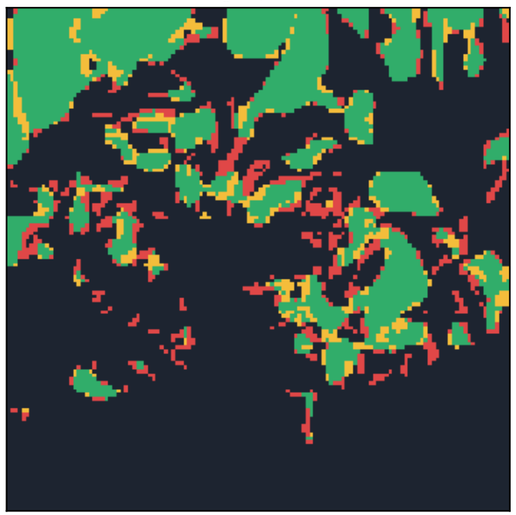

Counter geometry

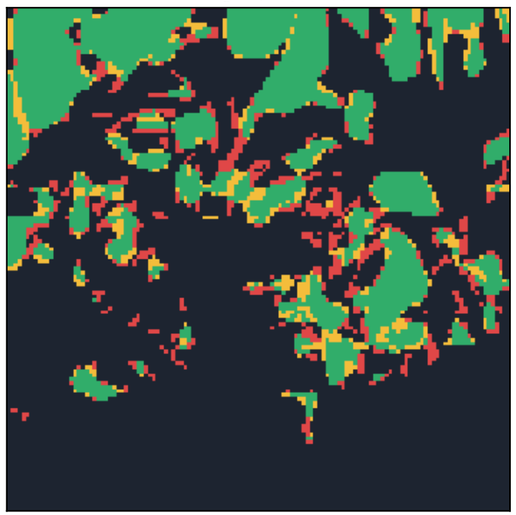

Joint geometry G00/G10/G01/G11

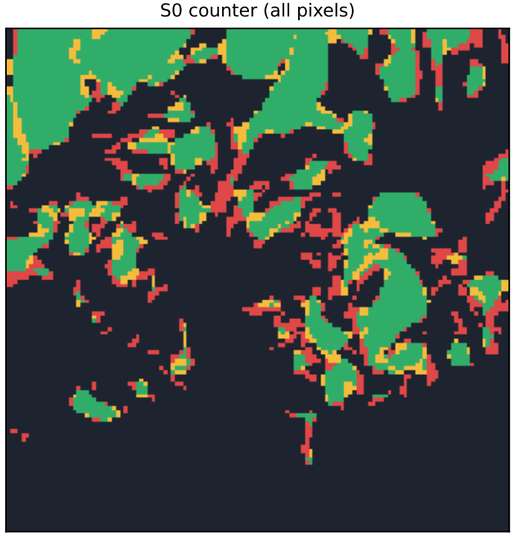

S0 target (all pixels)

S2 target (all pixels)

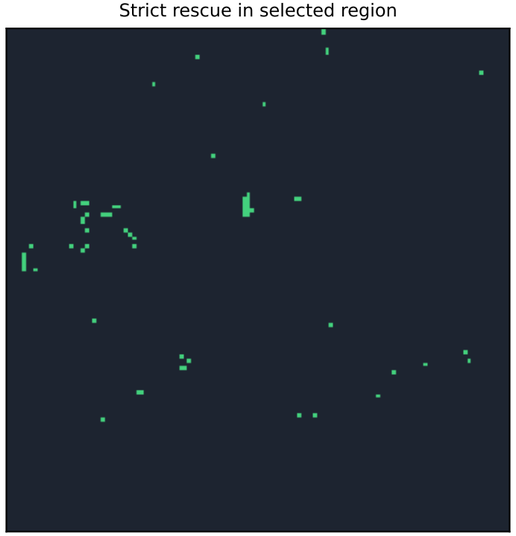

S0 counter (all pixels)

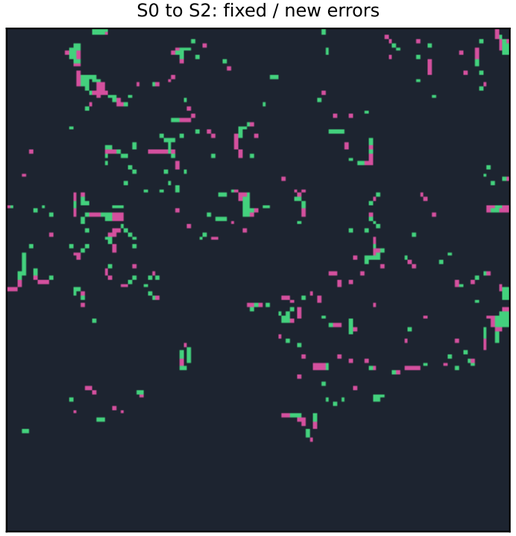

CG10 teacher (all pixels)

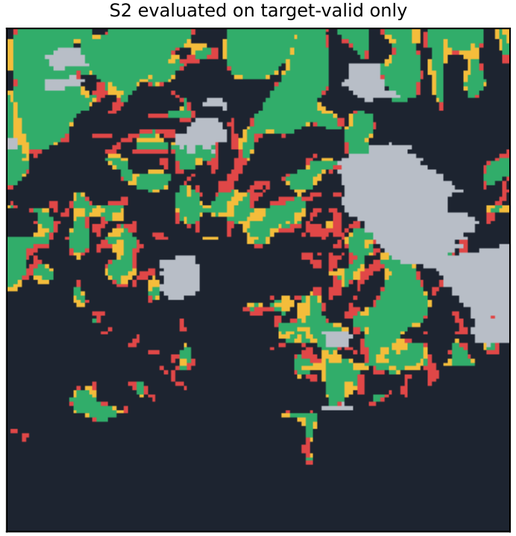

Strict rescue in selected region

S0 to S2: fixed / new errors

S2 evaluated on target-valid only

Magenta outlines on SAR = GT landslide; geometry gray=valid, orange=layover, blue=shadow, purple=both. Joint map gray=G00, orange=G10, blue=G01, purple=G11.
Error maps: green TP, red FN, yellow FP, dark TN. Last panel grays out target-invalid pixels; those pixels must still be assessed separately as G10/G11. Fixed/new map: green=fixed, pink=new error. Test-monitored illustrative evidence.
