(a) Dual-orbit teacher learning
target (pre/post, VV/VH)
shared ConvNeXt-Tiny/FPN
counter (pre/post, VV/VH)
shared ConvNeXt-Tiny/FPN
normal dual 1×1 fusion
target+dual policy context
target FPN memory only
offsets + softmax weights
DA sampling 3 levels × 4 points
dual output
SearchWrite + decoder
aux output
(b) Parameter transfer + target-only adaptation
T1 checkpoint backbone / policy / write
S0 inherits once no counter input
target + GT L_seg only
adapted S0
(c) Single-orbit deployment
target only
S0 search/write/decoder
prediction
$L_T = L_{dual} + 0.10L_{aux}$; $L_S = L_{seg}$
